# Project Design Phase-I
## Proposed Solution Template

| Date | 19 September 2022 |
|---|---|
| Team ID | PNT2022TMID27497 |
| Project Name | Skill and Job Recommender |
| Maximum Marks | 4 Marks |

| S.No. | Parameter | Description |
|---|---|---|
| 1. | Problem Statement (Problem to be solved) | Many people acquire skills in various fields and yet are confused about choosing the best career or job that suits them. |
| 2. | Idea / Solution description | To develop an end-to-end application for recommendation of skill/job for an individual based on their skills and talent. |
| 3. | Novelty / Uniqueness | A chatbot to interact with, which makes tasks manageable and also customizable for every user. Usage of web search API to customize selectively related job openings and opportunities. |
| 4. | Social Impact / Customer Satisfaction | It helps the user to figure out their dream job based on their area of interest or the field they are good at, accurately and at a faster rate compared to other applications. (User-friendly interface) |
| 5. | Business Model (Revenue Model) | The Freemium business model is used in which our website offers basic or limited search features to job seekers at no cost and then charges premium advanced search features. |
| 6. | Scalability of the Solution | Due to its impressive features such as the API web search, interactive chatbot, user-friendly interface, and high feasibility, this app can be developed and implemented in any web service (play store)/ mobile device. |
